

CITY OF MILWAUKIE

CLASSIFICATION: LEAD UTILITY TECHNICIAN

Department: Public Works

FLSA Status: Nonexempt

Pay Grade: 60

Union Representation: AFSCME

CLASSIFICATION SUMMARY:

Performs the most complex installation, maintenance, and repair activities for City water, storm water, wastewater, or street. Uses computer and data base systems. Operates a variety of light and heavy equipment to accomplish duties. This position is distinguished from the Utility Technician II classification by lead worker responsibility and complexity of assignments. Responds to emergency situations. Responds to inquiries from the public. The Lead Utility Technician is a working crew leader for at least two other crew members and oversees jobs related to operations. The Lead Utility Technician is responsible for job management, job safety and efficiency.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

(Tasks listed are intended to be descriptive and not restrictive. An employee in this classification may perform any of the tasks listed; however, these examples do not include all the tasks which an employee may be expected to perform.)

1. Works with and provides lead direction to assigned Public Works personnel; plans and directs work assignments.
2. Provides training in City software, equipment operation, heavy equipment signoff, work and safety procedures. Assures that work is performed according to established safety practices and procedures.
3. Creates standard operating procedures for assigned division.
4. Uses a variety of hand and power-operated tools and equipment such as shovels, picks, hand and small riding mowers, power hacksaw, drills, jackhammer, welders, compressor, portable concrete saws and weed whackers.
5. Operates all departmental heavy equipment as directed including backhoe, loader, dump truck, paver, roller, tractor, combination truck, T.V. van and sweepers.
6. Uses a variety of computer system software and equipment.
7. Responds to emergency situations and complaints regarding water leaks, pressure loss or no water, wastewater back-ups, flooding and storm issues and street conditions.; evaluates and documents non-risk situations and determines if liability lies with the City or property owners; explains findings to property owners and notifies appropriate utility crew.
8. Responds to public inquiries and service requests in a courteous and timely manner; evaluates citizen complaints by on-site inspection; may assign and dispatch crews to solve problems; provides information within scope of knowledge or refers to other City staff; may follow through with written reports.
9. Installs and/or repairs water mains, waste water and storm water lines, lift stations, well and pumping equipment, drywells, manholes and catch basins. Locates leaks. Installs pipe, accomplishes hookups, tests installation in accordance with established procedures, and back fills

LEAD UTILITY TECHNICIAN

excavation in related division.

10. Inspects sewer lines, cross connections and manholes through remote cameras, tests and monitors mains and laterals to confirm connections, breaks or flow direction. Installs or repairs wastewater lines and laterals; water line and storm line backfills; landscapes, and repaves as needed. Operates high velocity jet flusher or Vactor to clean, flush, and restore sewer lines and combination sewer cleaner to clean and flush catch basins and sumps in related division.
11. Inspects and oversees the repair of chlorine equipment, booster pump station, backflow assemblies, reservoirs, meters, streets, stormwater systems, sewer lift stations, water and sewer main line systems at frequent intervals to ensure all aspects of the system are functioning properly.
12. Conducts regular survey of streets, noting problem areas, potholes, cracks, and sign damage. Performs street maintenance and repair, including hot paving cold patching and crack sealing.
13. Works with Engineering to provide assessment of infrastructure condition prior to the expiration of project warranty work; provides review comments to engineering plans and standards.
14. Verifies infrastructure mapping and notifies proper person to update maps.
15. Acquires bids for equipment and projects from vendors.
16. Maintains right-of- way.
17. Installs water meters and meter replacements. Reads water meters. Installs, repairs, and services fire hydrants.
18. Locates water, sewer and storm lines for other utilities.
19. Prepares and maintains electronic work orders and records of daily work activity including time, materials, and equipment utilized through the City Works program.
20. Provides input to the budgeting and employee performance review process.
21. Participates in the City wide EOC emergency response program and may be assigned specific duties; participates in the Public Works emergency operations as required.
22. Oversees the safety of assigned workers by ensuring instruction of individuals in proper safety procedures and monitoring work in progress in the field.
23. Acts in the capacity of the Public Works Supervisor in that person's absence, as directed by the Public Works Director.
24. Maintains positive public relations with co-workers, and customers and is responsive to customer needs.
25. Develops safe work habits and contributes to the safety of self, co-workers and the general public.
26. Performs other related duties as required.

MINIMUM QUALIFICATIONS:

Knowledge of:

- Maintenance construction and repair methods and procedures used in assigned area.
- State regulations and requirements from OSHA and/or DEQ.
- City equipment and software such as City Works and Granite, Excel, Word and internet based systems, GIS software and SCADA programs.
- Safety practices and procedures applicable to area of assignment.
- Safe and effective operating practices of light and heavy equipment used in assigned area.
- Traffic systems, signs, and signals, techniques of flagging and traffic control.

LEAD UTILITY TECHNICIAN

Skills and Abilities to:

- Operate, maintain, and train others on various equipment used in utility maintenance such as backhoe, dump trucks and Vactor.
- Make sound decisions.
- Create and implement preventative maintenance programs.
- Perform heavy manual work under confined and uncomfortable conditions.
- Determine appropriate resources needed for a project and to direct the work of others.

Required Education, Training and Experience

(Any combination of education and experience that has provided the knowledge, skills and abilities to perform the essential duties of this position. Prior work experience and educational requirements listed are typical ways of obtaining the required qualifications. Other equivalent combinations of education, training and experience will be considered.)

- High school degree or GED.
- Four (4) years prior work experience equivalent to Utility Technician II in either water, storm/sewer, road maintenance or public works operations

Licensing/Special Requirements:

- Must possess, or be able to obtain by time of hire, a valid Oregon State Driver's License.
